- factfinding above the ordinary!

Visit Piteå - the new energy capital of Europe!

EXCLUSIVE BEHIND THE SCENES

Together with ICSB 2011 the city of Piteå invites you to an exclusive visit behind the scenes of one of Europe's most interesting sites for green energy and cleantech. In one exciting and enjoyable day, you will get a technical visit to two spear-tip projects that has resounded throughout the world in their respective fields: The Markbygden 1101 windfarm and Solander science park, world's first green DME-production facility.

WORLDS TALLEST

First we will visit the site of the windfarm Dragaliden, a pilot-project for one of the largest windfarms in Europe – The Markbygden 1101 project, whose aim is to build 4000 megawatts of windturbines in a sub-arctic terrain, something which has never been done before. The trip takes you through the desolate wilderness of Swedish Lapland's coastal forests to the windfarm where we will have an in-depth look at the world's tallest wind power plant as well as learn more about this ground-breaking project.

FROM TIMBER TO CARD BOARD SHEET

After an outdoor-lunch consisting of local delicacies the bus then takes us back to the city of Piteå. Next stop is at Smurfit Kappa kraftliner factory and Solander science park. During that visit we follow the process of making paper; from the unprocessed timber log all the way to the finalized card board sheet. Kappa kraftliner factory in Piteå is Europe's largest producer of kraftliner.

At the end of this visit we move a few steps over to the Solander sciencepark – home of the DME facility and the ETC gasification centre. At this unique research facility a very environmentally friendly fuel is produced; DME - manufactured completely from the residues of the forest industry.

STUDIO ACUSTICUM

"The never-before heard, the never before seen" is the theme for a unique organ construction that is now taking form in Studio Acusticum, one of Northern Europe's most modern, best equipped multifunctional concert halls. Adjacent to Studio Acusticum is the Institute of Music and Media.

The roundtour at both the industry and the Science Park ends with time for questions and discussions over coffee before we return to the hotel with lots of new impressions.

We wish you very welcome to stay longer – maybe take the opportunity to see more of Piteå and Swedish Lapland on your own. Please contact us for more information or visit our website. Welcome to Piteå!

TECHNICAL VISITS
- factfinding above the ordinary!

Visit Piteå - 14-15 June 2011

PROGRAMME

- Accommodation at Pite Havsbad 10 km south of Piteå city.
- Guided tour to the Windcraft farm Dragaliden. The roundtour starts from Pite Havsbad at 11 am, June 14th.
- Lunch
- Guided tour at the industry Smurfit Kappa Kraftliner and the Solander Science Park.
- Guided tour at Studio Acusticum
- Late dinner with influences from the region of Swedish Lapland
- Breakfast day two

PITE HAVSBAD - THE NORDIC RIVIERA
Pite Havsbad is one of the biggest tourism and conference centres in Northern Europe. Whether you're looking for relaxation, excitement, enjoyment or rewarding meetings, we have the facilities all year round.

Pite Havsbad has 394 hotel rooms ranging from two-bed rooms to luxury suites. All rooms have TV, telephone, shower/bath and toilet. Some rooms are disabled-friendly.

PRICE PER PERSON: 3500 SEK

PRICE INCLUDES
Guided visits to the Windfarm and Solander Science Park, lunch, dinner and accommodation and breakfast at the hotel Pite Havsbad.

TRANSFER
Fly to: Luleå Airport, approx. 60 km from Pite Havsbad.
We recommend a taxi from the airport to the hotel Pite Havsbad.
